

Dear Colleague,

NOL monitoring is making its mark in operating rooms around the world. We're happy that you too are keeping up on NOL's role in analgesia optimization and look forward to meeting you at upcoming events!

Out and about

A big thanks to everyone who met us at Euroanaesthesia (ESA) 2019 in Vienna. Our NOL Explore and User Group meetups, presented by Prof. Daniel Sessler, Prof. Dan Longrois and Prof. Stefan Schraag, were attended at full capacity, and the new NOL Simulation Hub experience was a sensation.

Earlier in the spring you might have met us at **Hospitalar** (Brazil) or **DAC (German Anaesthesiology Congress)** where local surgeons and anaesthesiologists presented their clinical experience with NOL monitoring.

Interested in learning how anaesthesiologists from all around the world are utilizing NOL? [View this video](#) with anaesthesiologist Prof. Hugo Verecke from Belgium.

Clinical results you should know about

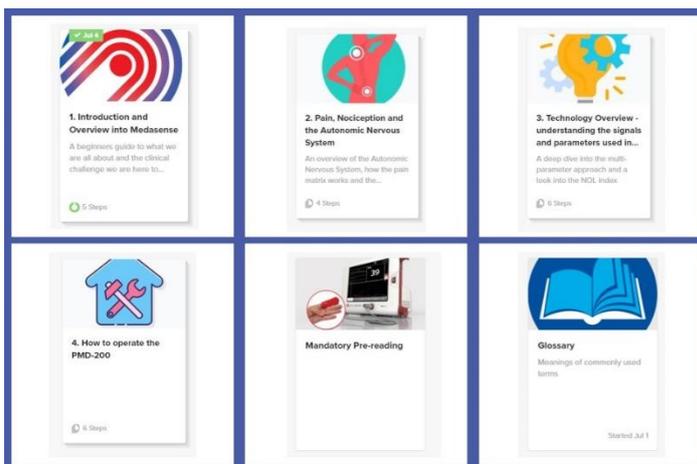

Clinical evidence supporting NOL monitoring continues to grow.

L. Barvais et al. presented a compelling abstract at Euroanaesthesia 2019: "Can NOL index calibration help to individualize remifentanyl TCI before skin incision?", concluding: "During propofol remifentanyl TCI, a calibration NAN balance test (With the NOL) using TET100 performed before skin incision could help to individualize the appropriate remifentanyl Ce required to maintain adequate haemodynamic stability during surgery."

Check out other recently published case reports, studies and abstracts [here](#).

Get to know our new online training platform

Our **Medasense Academy** platform has been launched, giving a great boost to our education and training program for clinicians and commercial partners via online lessons, quizzes and tutorials. To set up your personal account send us an email to academy@medasense.com.

Innovation showcase

MedTech Innovator chose Medasense as one of 50 best-in-class startups, out of 800 candidates worldwide. [Read more](#)

Media picks

Anesthesiology News, the leading industry magazine in the US, featured a [full-length article](#) discussing the recent NOL outcomes study ([Anesthesiology, Feb. 2019](#)) with Prof. Albert Dahan.

While at ESA 2019, Prof. Longrois also took the opportunity to share insights on nociception monitoring for an [item in the ESA newsletter](#) and for a [TopMed Talk podcast](#).

In case you missed our last newsletter, [here's a chance to catch up](#).

Following us on [LinkedIn](#) is another great way to stay up to date on Medasense's upcoming events and progress.

Until next time!

The Medasense team
