

Dear Colleague,

We hope this email finds you healthy and safe.

While the coronavirus is affecting the lives of each and every one of us, our appreciation and admiration go to our colleagues who are on the front line battling this pandemic – practicing clinicians and supporting teams.

Keep well and read on for some of our latest news!

---

## Inspired by NOL Users

The Medasense team keeps the excitement alive with the launch of version 2.2 of our [PMD-200™](#) NOL-monitoring system. In addition to addressing new EU regulatory requirements, this version includes new features that result from ongoing communication with our users, including the ability to check signal quality before monitoring begins, a demo mode, a 'Review Session' function to review a case immediately after monitoring and much more!

---

## NOL Monitoring for Improved Treatment of Dementia Patients

Medasense has been awarded an Israel Innovation Authority development grant to extend application of the [NOL index](#) for noncommunicating dementia patients. The development project is designed to enable improved pain care for this population and is conducted in collaboration with the Dorot Rehabilitation and Geriatric Medical Center in Israel. [Read the press release.](#)

## EuroSIVA Symposium

It was a great privilege for us to attend the EuroSIVA symposium, together with our commercial partners Medtronic Benelux. The event was held in

honour of Prof. Luc Barvais's retirement from clinical practice. Prof. Barvais was one of the first clinicians to use NOL in Europe to personalize analgesia management and improve patient outcomes.

## NOL in New Territories

Our strategic partnership with Medtronic has enabled us to launch the PMD-200 in exciting new territories: Austria, Switzerland, Greece and South Africa. In Bulgaria, our partner Sofmedica reports that NOL adoption is increasing, with new sites including University Hospital St. George in Plovdiv and Acibadem City Clinic Tokuda Hospital.

## NOL Simulation Training

**AQAI**  
SIMULATIONSZENTRUM

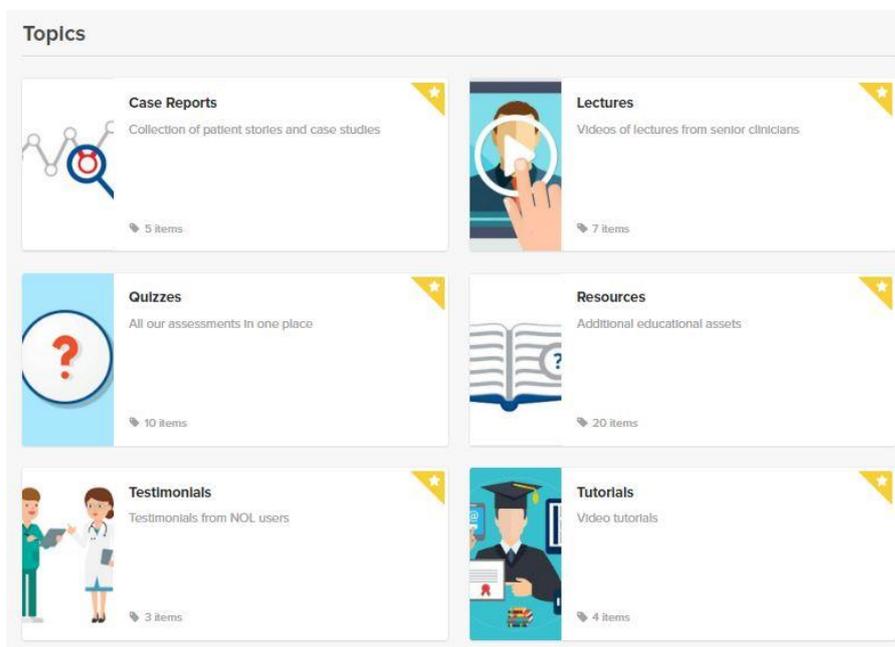

We are planning an exciting educational collaboration with our partner Medtronic and the AQAI Simulation Center in Mainz, Germany, with NOL simulation courses for anaesthesiologists and surgeons. The AQAI program includes keynotes from experts of worldwide reputation, roundtables, and

simulations that will familiarize the clinicians with how to integrate NOL in their practice safely and successfully.

## Expand your NOledge

This difficult time can be an opportunity to continue educating and training yourselves through our online [Medasense Academy](#), where you will find all our learning modules alongside many useful resources, new case reports and more.

---

In case you missed our last newsletter, [here's a chance to catch up](#).

Following us on [LinkedIn](#) is another great way to stay up to date on Medasense's upcoming events and progress.

Wishing you all good health and looking forward to better days ahead!

Let's keep in touch.  
**The Medasense team**
